Often they were overlooked or suffered discrimination, but members of racial minorities provided gallant military service that was vital to winning World War II.

That was the message of a ceremony Monday in which officials saluted blacks, Indians, Hispanics and people of Asian heritage who fought for America during that war.

Veterans of that age group are dwindling in number, and many survivors are infirm. World War II veterans were not present for the first event on Monday, held in the Department of Veterans Affairs Medical Center, 500 Foothill Blvd. However, one Indian veteran of World War II and others who served in the Vietnam and Desert Storm conflicts were able to attend a cere-

mony later that day in the medical center.

LaVonne Willis, director of the Utah Office of Veterans Affairs, noted that his great-uncle was a member of a black regiment in the days of segregation during World War I. The regiment fought alongside French troops and many of its soldiers won France's highest military awards.

In World War II, he said, the 99th Pursuit Squadron, another black organization, flew fighter escorts for bombers. The brave men

who fought in World War II. Despite discrimination, many nisei joined the 442nd Regimental Combat Team, whose nickname was "Go For Broke" because of their daring and drive.

"Let us never forget the sacrifices" made by Asian-Americans in World War II, Hawkins said.

James R. Floyd, director of the VA Salt Lake City Health Care System, said he hopes that this is the first of a yearly series of commemorations of the contributions of minority members of the military.

Green. After further investigation, including meetings with Green and trips to his trailer community called Greenhaven, about 100 miles west of Delta, Leavitt decided he had plenty of evidence and an obligation to prosecute the 51-year-old magazine salesman.

"To me it's undisputed that gal in Utah and it is not a victim," Leavitt said.

Leavitt considers Green's wives did not charge them. However, subpoena them to testify.

At Green's preliminary hearing, Leavitt will present for the first time Green, Leavitt must simply show cause that Green committed the offense in order to have the charges dropped.

While many will be watching closely and consider it a test of the state's law, the rape of a child is a more serious offense and carries a prison sentence on conviction of having sex with a 13-year-old. Leavitt will not say if the girl is one of Green's wives.

"That charge is much more serious to me," Leavitt said.

Green previously championed against the bigamy law and even courted challenge to what is right. Since the rape charge was dropped, Green has avoided the spotlight, attorney do most of the talking.

The child rape charge is also pro-polygamy groups have dropped Green's case from the sidelines.

"That is something we don't want to do," said Sydney Anderson, acting director of the

median barriers in place and remove temporary fencing used to keep rocks from tumbling onto the roadway. But completing such work in a pristine setting like Provo Canyon is not a simple task. Aesthetic and environmental concerns must be considered along with the Utah Department of Transportation's engineering and safety goals.

Also, the original plan has changed — which means more study and more public input is needed before work can move forward. "We have a process we need to go through first, but we're optimistic that we can get some work going this year," said UDOT Region 3 project manager Dan

"Technically, I'm single and available," Green joked at a news conference last year.

Green is reportedly only the fourth Utah polygamist prosecuted under the state's bigamy law in the past four decades. Many prosecutors and attorneys believe the law is unconstitutional because of the inconsistent and vague language of the term "cohabitant" in the state code.

Green remains free on a \$130,000 property bond.

One problem, however, is that Prowswood received a \$1.5 million loan from the city and its Redevelopment Agency to acquire the CityFront site. It was supposed to start paying that off, oh, right about now, and Lofgren is trying to convince city officials to extend the terms.

"It could be a problem for us, but it may not be," said Deeda Seed, chief of staff to Mayor Rocky Anderson. "It just depends on how long he puts it off."

Salt Lake Organizing Committee officials say they're OK with the revamped deal because the total amount of media housing would not change, and journalists would still be close to the Salt Palace Olympic media center.

Lofgren wants to put the City-

Front project on hold partially because he's afraid of saturating the housing market after the 2002 Games. During the Games most of the units will be occupied by members of the 9,000 journalists coming to town.

Not counting the CityFront development, Prowswood plans to develop about 800 new units in Cambridge, the adjacent North Village Townhomes and the Bally Co.'s Gateway project west of the Union Pacific Depot, making it one of the largest residential developments in the city's history.

"My guess is (the city) will work with us" in reworking the deal, Lofgren said.

of the squadron "proved to the skeptics and to the Germans both that they were wrong" in assuming black people couldn't master aviation. They were part of a long line of black service members dating to the Revolution.

Forrest S. Cuch, a member of the Northern Ute Tribe and the director of the Utah Division of Indian Affairs, said that when his father fought in World War II, the older

Cuch and a friend who was a Pueblo Indian were called to listen to an officer's radio. The officer asked them to translate the message that was coming over.

The message was spoken by one of the Navajo code-talkers, whose contributions were crucial both in Europe and the Pacific. No other code-talker was around to translate it. But the Ute and the Pueblo man listened and had to tell the officer that they couldn't tell what he was saying.

Just because they were Indians didn't mean they could speak that particular Indian language, they

pointed out.

In fact, said Cuch, the code-talking by the Navajo, Lakota, Choctaw and other groups was never cracked by the enemy. "Only recently are they receiving credit in the history books," he said.

"Our people continue to serve this country. It's our country too. We don't forget that."

Major Mark A. Ramirez of the Marine Corps noted that his father was an American citizen born in this country to a couple from Mexico, who returned to Mexico. When Ramirez's father went to San Diego

and joined the Marine Corps, at

first "he had a hard time, to be honest, because he didn't speak English."

However, he added, "the military for many Hispanics is an opportunity." He called for more Hispanic students to stay in high school and earn diplomas so they can take advantage of such opportunities.

Capt. Catherine L. Hawkins of the Army Quartermaster Corps., herself a Japanese-American,
